

Filtered Material Inquiry Record Form

User Company Name					
Contact Person & Email		Department			
Target Material		PH			
Solid Content		Particle Size			
Filtration Temperature		Crystallization Temperature		Viscosity	
Both solid and liquid need to be recovered after separation ☐		Filter Material		Seal Material	
Feeding Flow Rate	Filtrate Flow Rate:				
	Clarified Liquid Flow Rate:				
Processing Status	Remaining material can be reused ☐				
Is cake washing required?	No ☐	Yes ☐	Which liquid is used for washing and the washing temperature?		
Slag Discharge Requirements	Wet Slag Discharge ☐ Dry Slag Discharge ☐ Other Requirements:				
Additional information					
What type and model of filtration equipment was previously used?					
Hourly Processing Capacity					
Filter Cake Layer Thickness					
What defects exist?
